
Please note: As of July 1, 2008, **ONLY** installed transponders are used to access the front Resident Lane and the rear gate of the Baytree Community Development District. If you are a resident, you will be able to have a transponder installed on all vehicles registered within the District. Should you require a new or replacement transponder, or are having issues with an installed transponder, please contact the District Office for the Baytree Community Development District. The office may be reached at **1-877-855-5251** or **407-841-5524**. The Staff and Supervisors of the District will coordinate an appointment time with you to have a transponder installed on your vehicle. Until that transponder is installed, you will need to use the Visitor lane at the front gate for access to the community. Thank you for your cooperation and understanding.
